

Point Distribution

Iteration 6 – Project Completion.

1. Usability Improvements and System Integration (60 points)

- Implementation of Peer Review Changes (20 points):

- Demonstration of specific changes made to the system based on peer review feedback.
- Clear explanation of the rationale behind each change.

- Unified System Presentation (20 points):

- Presentation of the system with a consistent look and feel across all screens.
- Explanation of any deviations from the common design and the reasons for these differences.

- Comparison and Justification (20 points):

- Comparison of the final UX design to the original plans, detailing what was omitted and the justification for these decisions.

2. Database and Data Consistency (10 points)

- Common Database Usage (5 points):

- Evidence of using shared database tables where appropriate, such as song lists or user profiles.
- Explanation of how data consistency is maintained across different user interactions.

- Data Integration Across Screens (5 points):

- Demonstration of how data changes are reflected across various screens and user roles.

3. Demonstration (20 points)

- Proper Demonstration of Usability for Each Profile (30 points):

- Comprehensive demonstration showing the usability of the system from the perspective of each user profile (Producer, DJ, Listener, and Manager if applicable).
- Functionality provided is applicable to the selected role and a radio station
- Clear and concise explanation of the functionality and features as they relate to each specific user role.
